

## Check-list for keeping your steam system optimized

- Steam Dryness = Max Energy Content / Min Distribution Losses
- Upgrade Boiler Level Controls & Feedpumps
- Automate Bottom Blowdown & TDS Blowdown
- Consider Blowdown Heat Recovery
- Minimise Distribution Losses with Good Working Practice
- Eliminate Hot Water Storage
- Monitor Steam Trap Operation
- Consider Leak-Tight Control Valve Seats for High-Accuracy / Maximum Efficiency
- Maximise Condensate Recovery Mass
- Minimise / Recover Flash Steam Losses
- Meter Steam Generation / Distribution / Process
